Video wall
(greeting in the foyer)
· 8 monitors beside each other (á 55″)
· 7680 pixels x 540 pixels

Video wall
You can play image and video files on our two video walls. To do so, you must provide us with your image file in PNG or JPG format with a resolution of 3840 x 1080 pixels. For video files, we require an MP4 file in H.264/AVC format with a maximum bitrate of 10 Mbit and a resolution of 3840 x 1080 pixels.

This is how it appears on the display strip (7,680 pixels x 540 pixels):

Design:
The content is initially created as a single continuous area in the format 7680 × 540 px—matching how it will later appear on the LED wall.

Preparation for Playback:
The entire image is then divided into eight segments of equal size, each measuring 960 × 540 px.
For playback, these eight segments are then arranged in the following order:

Top row: 2 – 3 – 6 – 7
Bottom row: 1 – 4 – 5 – 8

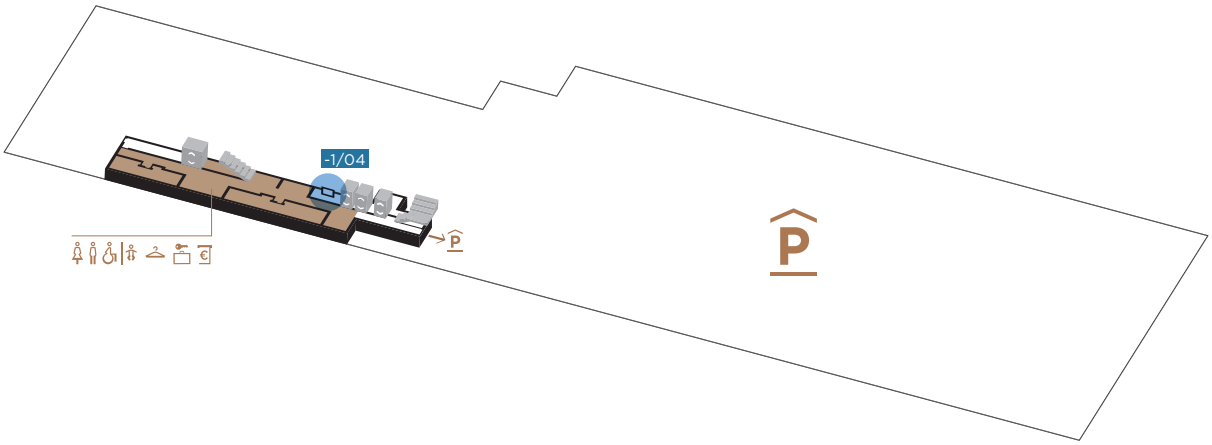

The resulting final video or graphics file has a resolution of 3840 × 1080 px.

Information on using the RMCC signage system

Would you like to brand your event space or display event information to help guide your attendees? Then feel free to use our digital wayfinding system.

We'll enter your event details once a day for each room, using your defined corporate design.
This setup is included as a free basic service when you sign the contract.

Please send us the following information at least 14 days before the event:

· Date of your event
· Room name at the RMCC
· Start and end times for room use
· Headline (usually the event title)
· Subline (usually the purpose of the room)
· Logo (as a PNG file) and/or company name

The information is displayed on the door signs outside your reserved room and automatically transmitted to the information kiosks and wall-mounted monitors located throughout the building to provide wayfinding guidance. It is not possible to change the position or orientation of the information kiosks.

Is your event more complex and spanning multiple days? Upon request, we'd be happy to provide you with a template for submitting the necessary information.

Would you like to display your own branding on the monitors and information pillars? For example, PNG or JPG files can be displayed full-screen on our displays, allowing you to make your event even more personalized.

Additional services beyond the basic package (e.g., multiple changes or custom branding on displays and video walls in the form of image files) are billed at €55 per hour plus VAT.
In addition to visitor guidance, you can also use our digital wayfinding system for advertising purposes during your event. We'd be happy to provide you with a customized quote upon request.

If you have any questions, please contact *logistik@wicm.de* or call us at *0611 1729-469.*
