International Conferences

Why RMCC is ideal for international association conferences and congresses

- **Two large, divisible congress halls for plenary sessions and parallel formats**
- **Flexible room concepts for breakout sessions, exhibitions, and networking**
- **State-of-the-art technical infrastructure for hybrid and digital events**
- **High security standards suitable for high-profile and sensitive events**
- **Excellent international connectivity (Frankfurt Airport – 20 minutes)**

Example: FEDESSA Conference

The venue

The FEDESSA Conference will take place in Halle Nord at the RheinMain CongressCenter (RMCC) in Wiesbaden, a modern and highly flexible venue designed to host large international events.

The trade show will be located in the first section of Halle Nord, offering approximately 2,200 m² of exhibition space. Positioned at the heart of the conference, the exhibition will serve as the main networking hub where delegates, operators, and suppliers connect throughout the event.

The conference plenary sessions will take place in Segment C of Halle Nord, allowing seamless movement between the exhibition and the conference programme and ensuring strong footfall across the trade show area.

Registration will be located at the entrance to the exhibition hall, guaranteeing that all delegates pass through the exhibition space and maximising visibility and engagement for sponsors and exhibitors.

Conveniently located within walking distance of Wiesbaden's main train station and just 20 minutes from Frankfurt Airport, the RheinMain CongressCenter offers excellent accessibility for both European and international attendees.

Example: EUMETSAT Conference

Source

The image shows a banner for the Ocean Surface Topography Science Team Meeting 2026. At the top left is the EUMETSAT logo with the text 'EUMETSAT 1986-2026' and a satellite icon. To the right of the logo are navigation links: 'IMAGES', 'SATELLITES', 'ABOUT US', 'DATA AND SCIENCE', 'EDUCATION', and 'NEWS AND EVENTS'. The background is a dark, low-angle photograph of a bridge's steel truss structure against a twilight sky. A street lamp is visible on the right side. The main title 'Ocean Surface Topography Science Team Meeting 2026' is centered in large white font. Below the title, the location and dates 'Wiesbaden, Germany, 22-26 June 2026' are listed. A horizontal line separates this from a paragraph of text: 'The Ocean Surface Topography Science Team Meeting (OSTST) offers a unique opportunity to explore the performance of satellite altimetry constellations and to provide a forum to reflect on user needs for future systems'.
